Arizona State University

Tempe, AZ

May 2025

- Honors: Summa cum laude, Moeur Award, Dean's List (8x), NAmU Recipient, AP Scholar Award
- Relevant Coursework: Data Structures and Algorithms, Theory of Computation, OOP, Data Science
- Club Officer, Software Developers Association (SoDA): Organized workshops, projects, and events for 300+ developers

PROFESSIONAL EXPERIENCE

Chief Technical Officer | CoFounder

OnixAI

Dallas, TX

Aug 2025– Present

- Overseeing system architecture and core engineering for RURL, a scalable cab-sharing and food delivery platform built with microservices and real-time location services.
- Leading architecture of secure REST APIs, deployment pipeline, and React Native mobile + Next.js web platform with authentication, payments, and live tracking.

Software Developer

Honeywell International — Capstone Project

Tempe, AZ

Jan 2024–Dec 2024

- Developed a blockchain-based UAM Management platform using **Hyperledger Fabric** and **React** to ensure secure, real-time tracking of Urban Air Mobility parts and systems.
- Designed intuitive UI/UX interfaces while improving transparency and traceability across distributed networks.

Undergraduate Teaching Assistant (CSE100, CSE120)

ASU Ira A. Fulton Schools of Engineering

Tempe, AZ

Jan 2023–Dec 2023

- Assisted 150+ students across CSE100 (Programming in C++) and CSE120 (Digital Design), holding office hours, grading assignments, and helping students with debugging, digital logic simulation, verilog and hardware abstraction concepts.
- Supervised labs simulating ALUs and CPUs in VHDL, and mentored students through foundational computing concepts.

IT Assistant Intern

Softpro India

Lucknow, India

Mar 2020–Dec 2020

- Contributed to software development projects in C++, C, and Python; supported documentation and testing.

PROJECTS

Visualizing Real Madrid's Legacy | Full Stack Project | Link

Jan 2025–May 2025

- Developed a React + D3.js scrollytelling app to showcase Real Madrid's history through interactive visuals.
- Engineered dynamic graphs for player stats, match outcomes, and club milestones using custom data pipelines.

Spotify Song Recommender System | Independent ML Project | Github

Feb 2024–Mar 2024

- Analyzed 26K+ songs using **R** and **Python** to uncover trends in song popularity and audio feature correlations.
- Engineered a **content-based recommendation engine** leveraging **cosine similarity** and **Euclidean distance** on audio features, applying ML techniques for accurate, genre-agnostic music discovery.

Calaminct App | Apple Inc. & U.S. Department of Homeland Security | GitHub

Jan 2022–May 2022

- Led development of an iOS app enabling peer-to-peer disaster relief coordination with Swift, backend integration, and real-time networking. Awarded **\$1000** for innovation and impact.
